John

THE EXPERTS' EXPERT

Enjoyed in discerning homes, landmark hotels and resorts throughout the world, *Majestic* is recognised by leading architects for exceptional shower screen design.

We work closely with designers and architects, using our expertise to ensure their exacting standards are met for prestigious projects.

"We were attracted by the classic lines and clean, simple designs of Majestic for our prestigious development, The Lancaster. With over 300 bathrooms to install we used a combination of the framed shower screens and frameless bath screens. Mixing classic and contemporary – which is exactly what The Lancaster is all about."

Orlando Rodriguez
Associate Director,
Nilsson Architects

Majestic's products were in keeping with the rest of the development, in terms of both quality and finish. And because their shower screens come in a wide range of sizes, we had a greater degree of flexibility with our bathroom designs and layouts. Majestic also provided good technical back-up throughout the project."

A stylized handwritten signature in dark ink, appearing to read 'O. Rodriguez'.

Survey and Installation Service

We will visit your home to survey your shower space and advise on your specification. Your enclosure will be manufactured to the precise measurements taken on site and installed by our expert installers. Painsstaking care is taken on site, with profiles adjusted to millimetre perfect lengths, to ensure you receive the best in fit and finish.

Postcodes served

Postcodes are divided into areas 1, 2 and 3. Please see the key below and map overleaf to find your postcode.

- Area 1
- Area 2
- Area 3 - price on application

All London postcodes fall within Area 1. Other postcodes not shown are in Area 3.

Tiering information

Products are grouped into tiers for pricing purposes. Please see product pages for tiering information (pages 87-144).

Things to bear in mind

Before we are able to survey your site, your shower area must be finished, with wall tiles and shower tray installed. 10mm Frameless glass is heavy, therefore it is essential that there are appropriate grounds for our fixings wherever the shower screen meets a wall or ceiling. The minimum requirement is 19mm thick ply behind plasterboard and pipes must not be run behind fixing points.

Terms and Conditions

Survey requirements are provided at the point of enquiry. Two working days notice is required to cancel and rebook appointments. Both surveys and installations cancelled with less notice will be charged at the aborted installation price. A decision maker must be present at both survey and installation for confirmation of specification and placement of enclosure, in addition to sign off both pre and post installation.

Management of the service

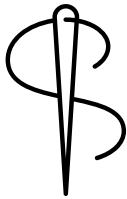

Your bathroom designer will provide Majestic with your product, address and contact details. Subsequently, we will contact you to arrange a site survey. When the site survey has been completed we will provide your designer with a comprehensive quote, taking into consideration exact dimensions and any other relevant information.

Oversized panels

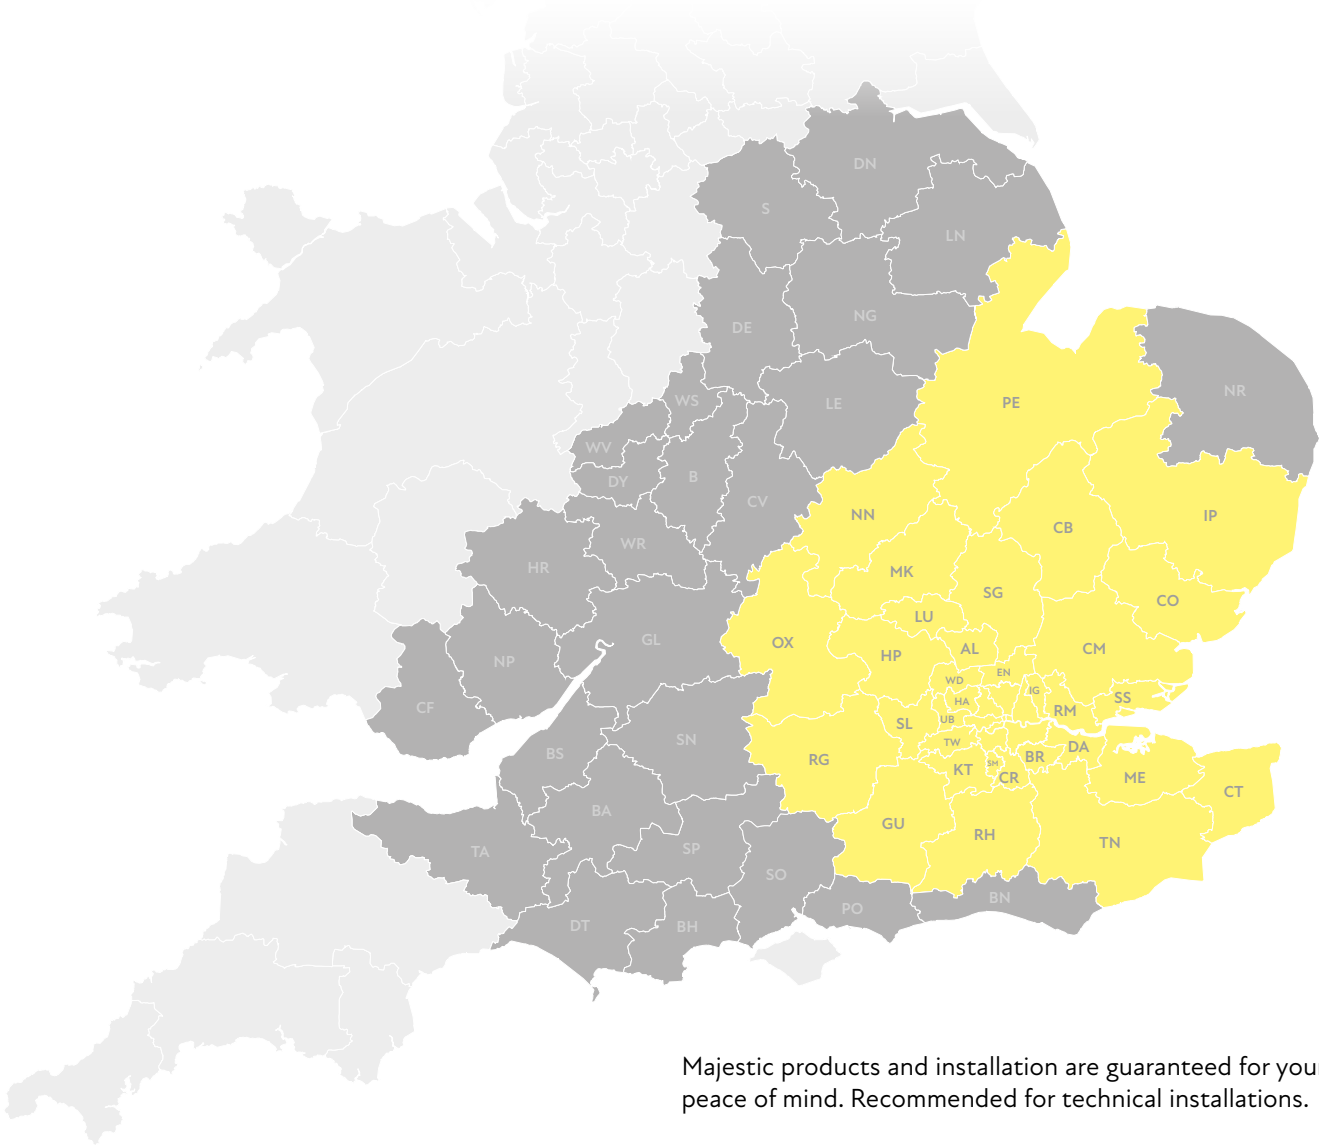

Panels over 2.8m² are considered oversized due to their weight and complexity to handle. Enclosures with oversized panels will be highlighted following the site survey. They may require a courier service delivery in addition to a 3 man installation team, therefore oversized units will be subject to a surcharge of £255.

Further Services	Area 1	Area 2

Due to the inherent nature of the materials that make up a shower enclosure, there may be slight difference in the lustre of the profiles against that of the components.

GLASS

All Bespoke enclosures are available in clear, satin etched and crystal clear low iron glass. Tinted, mirrored and printed glass is also available in our Frameless and Beyond Bespoke portfolios.

Art Glass is available from selected dealers only.

Technical details

All Frameless and Beyond Bespoke shower screens are made in 10mm glass. Demi Framed doors are 8mm. Our glass is toughened safety glass to BS EN 12150.

In accordance with BS EN 14428 each enclosure is marked with BS EN 12150, usually on the leading edge of the door or panel.

Art Glass (POA)

Carved: Patterns are hand carved deep into the surface of the glass by an atelier in South London.

Crystal Drawn Fluted: Produced via the Fourcalt process, the traditional method of flat glass production, Crystal Drawn Fluted Glass is drawn vertically upward from a molten pool of high purity glass before its surface is flamed polished. This artisanal production process imbues its characteristic crystalline clarity and organic surface.

Glass protection

Majestic has researched all the glass protection products available in Europe and the United States. We find that EnduroShield is optimum for showers. The properties are such that we guarantee the effectiveness for five years. Only a damp micro-fibre cloth and mild detergent should be used for cleaning.

SARAH

We provide the know-how. You bring the creativity.

It was working this way with the designers across two super-prime developments that the *Sarah* was born.

A variation of this shower and W/C enclosure was first created in 2017. Developed to meet Finchatton's ambitious design intent for 20 Grosvenor Square, the former command centre for General Eisenhower's Operation Overlord. The design has since evolved through several iterations, each crafted to meet the need of architects and designers over a series of bespoke projects.

This ethos of creative collaboration, whereby our expertise is melded with a designer's vision, is intrinsic to Majestic and echoed by the approach Sarah Roche has taken with clients throughout her Majestic career. It is with a deep sense of gratitude and appreciation that we have chosen to name this enclosure after her.

Sarah joined Majestic in 2003, created our Specification department from scratch and has worked on some of the finest developments in London. To name a few, these include One Hyde Park, St. Pancras Renaissance Hotel, The Shard Residences and No. 1 Palace Street.

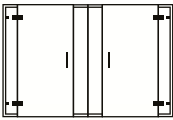

"There has been a great deal of research into the ways design and the built environment affect our mood and wellbeing."

"When you have high quality and beautiful things around you, that you see and use every day, they're a pleasure to have in your life."

When installing the Levant without a headrail, there must be clearance above the door. Please do not order to the exact aperture height when choosing not to specify a headrail.
When installing with optional headrail, a 150mm gap is required between the headrail and the ceiling or soffit for fixing. Therefore the door should be installed prior to the soffit.
When installing with optional headrail into a pre-existing aperture, the headrail can be installed from below. This must be specified when the order is placed.
